YOU KNOW

that you can't afford to have your plant shut down because a gasket blows out. You must know, therefore, that you can't afford to use any but the very best gaskets obtainable.

WE KNOW

that Goetze's Elastic Copper Gaskets supply a **positive** remedy for leaking joints, no matter how high the pressure or temperature. Send for a free sample for a practical test.

YOU DON'T KNOW

POLISHED WIRE GLASS.

When your property will be swept away by fire and the loss you may have to suffer in consequence.

That you are or are not amply covered by insurance is of little account when you stop to consider that a vast portion of your loss may include that which money can never replace. It is gone forever to the ash heap. You don't want to burn out. Be wise. Install Wire Glass set in metal frames and you will then have adopted the best means of protection and in the long run the most economical.

BETWEEN THE TWO

LARGEST PRODUCERS OF ESTABLISHED 1848 MISSISSIPPI GLASS CO NEW YORK-CHICAGO-ST.LOUIS-PITTSBURG ROLLED AND FIGURED GLASS

An architect, a builder or a property owner has his glass problem solved, not for the present only, but for all time to come.

IN WIRE GLASS he finds a product of unequalled **Fire Retarding Efficiency** that prevents the entrance or egress of draft and flame and the perils attending glass breakage, while in **Mississippi Figured Glass** he has clearly defined, forceful and decorative patterns of great brilliance and diffusive power, especially suitable for interior glazing of all classes of buildings.

MISSISSIPPI FIGURED GLASS.

MAZE.

ORNAMENTAL AND HARMONIOUSLY EFFECTIVE.

Produced in various patterns possessing much brilliance and expression and free from the objections inherent to chipped, ground or enameled glass.

Especially suitable for interior and exterior glazing of all classes of buildings, steam and electric passenger cars, ferry boats, yachts, and a variety of special uses where a maximum diffusion of light, together with an exclusion of vision, to insure privacy, are demanded.

"NEVERSPLIT" TOOL HANDLE

¶ As the name implies this handle does not split and is practically indestructible, the FERRULE being made of PRESSED STEEL.

¶ The peculiar shape permits driving the file or other tool firmly into the handle centering itself perfectly, where it is held rigidly, doing away with the necessity of tapping the tool back into place every now and then as it cannot work loose.

¶ Owing to the length and strength of the FERRULE the workman is free from risk of accident, and saves the cost of the handle in the time required renewing the old style handles.

¶ The NEVERSPLIT tool handle will outlast a dozen or more of the ordinary handles, and this not only makes it the BEST but the CHEAPEST handle on the market.

HOSE

RUBBER—COTTON, RUBBER LINED—LINEN

FOR WATER, STEAM, AIR, FIRE PROTECTION, SUCTION, GAS, PNEUMATIC TOOLS, ETC.

FORSYTH BRAIDED HOSE

Seamless rubber tube. Special cotton yarns of great strength. High grade rubber throughout. Each ply is a circular braided fabric, seamless and complete in itself. This hose is immensely strong, extremely flexible, practically non-kinkable. Highly satisfactory and economical from every standpoint.

COTTON RUBBER LINED HOSE.

We weave our own cotton fabrics and make and insert the rubber lining, giving the maximum hose value with only one manufacturers profit.

OUR AMERICAN UNDERWRITERS HOSE

TRADE MARK

{ Cotton, rubber lined for outside or yard use.
Linen, unlined for inside use.

Is a NATIONAL STANDARD in Fire Protection Equipment. Accepted and approved by all Insurance Interests.

EDISON INCANDESCENT LAMPS

Are the best incandescent lamps made. The fact that over 60,000,000 are sold every year proves it.

GEM, TUNGSTEN AND TANTALUM FILAMENT LAMPS

Afford a most attractive form of illumination and are suitable for all classes of interior lighting service. These lamps are simple and safe, low in cost and high in efficiency, flexible and adaptable, and their uniform light is both brilliant and soft.

MAIN LAMP SALES OFFICE: HARRISON, N. J. **Sales offices in all large cities.**

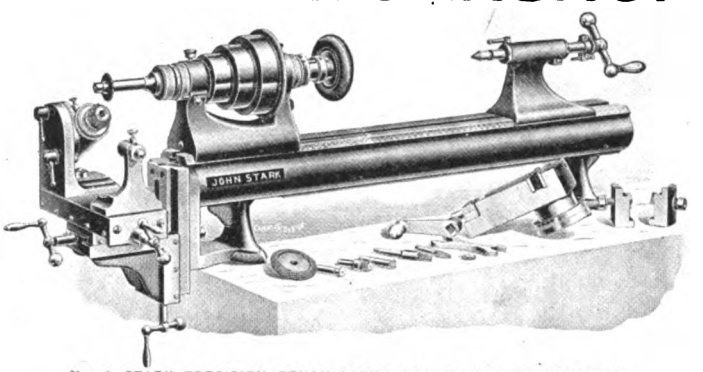
LATHE IDEAS OF NOWADAY

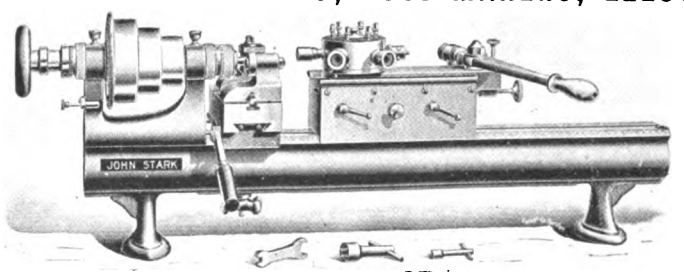
No. 4 STARK PRECISION BENCH LATHE.



Length of bed 38', distance between centers 20'. Lathe swings 9" and chuck capacity for stock from 1-64" to ½" clear through. Equipped with Stark Patent Anti-Friction Draw-in Spindle and Anti-Friction Ball Bearing End Thrust, which takes the strain off the bearings and does away with the back geared arrangement.

The Spindles and bearings are made of steel, hardened and ground to perfection, having angles of 3 degrees and 45 degrees. This principle is of great importance and is one of the essential features of the Stark Bench Lathes.

ECONOMY IN THE WORKSHOP



The Milling Attachment, is bolted to the angle iron which is cast with the bed, making it rigid and capable of accomplishing a large range of work. It has a lengthwise feed of 6', in and out feed 2½' and up and down 4¼', with distance between centers 6'. The height from bed to center is 3⅛'. This attachment takes the same chucks as are used in the lathe head.

We have demonstrated to the trade that spindles made with the taper bearings are more durable, last longer, and give better satisfaction than spindles made upon other principles.

No. 4 STARK PRECISION BENCH LATHE AND MILLING ATTACHMENT.

FOR ENGINEERS, TOOL MAKERS, ELECTRICIANS, ETC.

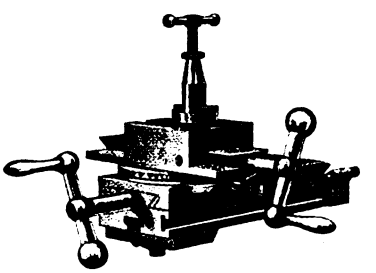
The Automatic Turret Head has six ½' port holes to receive mills, drills, taps and dies, built strong and rigid, all the bearings and port holes are bushed with hardened steel, taking the place of a screw machine.

The cutting off and forming is suited for a variety of irregular formed pieces. The cutters are turned to the forms required, and only have to be ground on the face when sharpened.

No. 4. STARK PRECISION BENCH LATHE WITH AUTOMATIC TURRET HEAD AND CUTTING-OFF AND FORMING REST.

No. 4 Wire Chuck, Capacity of chuck ¼'

FIVE YEARS AHEAD OF THEM ALL.



The nose of the spindle has a thread cut 10 pitch, which is hardened and ground to a perfect standard to receive Universal Chucks, and also a supporter for step chucks. This gives a greater advantage when using the Universal chuck as the work may pass clear through the spindle.

There are no Arguments in Favor of our Foreign Trade Service so Strong as OUR RECORD

(*a*) We are 31 years old, having been established since 1877. Each year we have secured a stronger foothold in the export field.

(*b*) We have advertisers who have been with us throughout these 31 years.

(*c*) 650 advertisers use our columns continuously and regularly, averaging 140 pages an issue.

(*d*) Our circulation each month reaches a new "high water mark."

(*e*) We have hundreds of letters recently from our clients proving that our advertising space gives excellent results.

These facts taken into consideration, even the most skeptical have to acknowledge that our service MUST be all right.

Don't you want us to send you a sample copy of the AMERICAN EXPORTER? It will interest you and be worth your while.
